◐ syamsundar

SYAM SUNDAR S
Frontend Developer

PROFESSIONAL SUMMARY

With 3+ years of experience in front-end development, focusing on designing, developing, maintaining high-quality, responsive and user-friendly web applications. Proficient in implementing innovative solutions, optimising performance, and staying current with the latest front-end technologies to drive continuous improvement and effectively meet business needs.

EXPERIENCE

Front End developer
CISAI, Kollam - Kerala
Jan 2021 - Working

- Collaborated with multiple cross-functional teams to gather and align requirements with business objectives, ensuring seamless communication and promoting effective teamwork. Designed and implemented various web applications from scratch, successfully delivering projects within deadlines and achieving successful deployments that contributed to project success.

- Led the development team for a news portal by collaborating with the UX team on design and prototyping, as well as coordinating with back-end developers to implement REST APIs and establish continuous integration pipelines, ensuring all requirements were effectively met.

- Engineered and enhanced key features of web applications utilising JavaScript, HTML, CSS, and Angular framework. Additionally, implemented scalable solutions to address identified issues, resulting in improved performance and user experience.

- Successfully implemented a micro-front-end architecture primarily using Angular, working independently to create the initial setup for seamless integration between various web applications through multi-repository management and using native federation.

EDUCATION

2016 - 2020

B.E Computer Science

Rathinam Technical Campus, Coimbatore

Grade - 7.2 CGPA

2014 - 2016

Higher Secondary School

Chinmaya Vidyalaya, Rajapalayam

Grade - 80.5%

KEY PROJECTS

News Portal (*Frontend Technologies used :* html, css, javascript, jquery)

I served as the sole front-end developer on a news portal project, where I were responsible for implementing and integrating features related to both live and local news. This involved close collaboration with both UX and back-end teams to ensure seamless data integration.

Vehicle Tracking (*Frontend Technologies used :* html, css, javascript, jquery)

Led the development of my first front-end application, implementing vehicle tracking functionality using OpenStreetMap to enhance the application's mapping and navigation capabilities.
